Countermeasures Injury Compensation Program (CICP) Data

Aggregate Data as of March 1, 2022

The Countermeasures Injury Compensation Program (CICP) provides compensation for covered serious injuries or deaths that, based on compelling, reliable, valid, medical and scientific evidence, are found to be directly caused by the administration or use of a covered countermeasure or are determined to meet the requirements of a countermeasure injury table. Temporal association between administration or use of the covered countermeasure and onset of the injury (i.e., the injury occurs a certain time after the administration or use) is not sufficient, by itself, to prove that an injury is the direct result of a covered countermeasure.

It is important to note that the CICP data only captures the alleged countermeasure(s) and the alleged injuries that CICP requesters list on their Request for Benefits forms (RFB) or claim. The countermeasure or injury listed by the requester on the RFB may or may not be consistent with the requester's medical documentation or the injury resulting in compensation. While requesters are required to identify the alleged countermeasure on their RFB form, they are not required to list the specific manufacturer or trade name on their RFB form.

Furthermore, while requesters must submit their RFB form within 1 year from the administration or use of the covered countermeasure, requesters are permitted to submit the necessary medical records and other documentation, such as a copy of a requester's COVID-19 vaccination record, after the RFB is filed. For the majority of COVID-19 countermeasure claims, including COVID-19 vaccine claims, the CICP is still waiting for records and documentation to be submitted.

When was the first CICP claim filed?

The first CICP claim was filed in Fiscal Year (FY) 2010; there are no CICP claims to report on prior to FY 2010.

Is the CICP data available by specific manufacturer or trade name?

The CICP does not maintain its aggregated data concerning alleged countermeasures, including vaccines, by specific manufacturer.

How many claims has the CICP compensated?

The CICP is the payer of last resort and can only reimburse or pay for medical expenses or lost employment income that are not covered by other third-party payers. To date, the CICP has paid compensation for 30 CICP claims, totaling more than \$6 million. An additional 10 CICP claims were eligible for compensation after a review of the required medical records and documentation; however, in these cases there were no eligible reported medical expenses or lost employment income for the CICP to compensate.

Has the CICP made any decisions regarding COVID-19 Claims?

As of March 1, 2022, the CICP has not compensated any COVID-19 countermeasures claims. Six COVID-19 countermeasure claims have been denied compensation because the standard of proof for causation was not met and/or a covered injury was not sustained. One COVID-19 countermeasure claim, a COVID-19 vaccine claim due to an anaphylactic reaction, has been determined eligible for compensation and is pending a review of eligible expenses.

Table 1. Alleged COVID-19 Countermeasure Claims Filed as of March 1, 2022

This table displays the alleged countermeasure and alleged injury/death for each COVID-19 countermeasure claim filed as of March 1, 2022. Of the 7,056 COVID-19 countermeasure claims, 4,097 allege injuries/deaths from COVID-19 vaccines and 2,959 allege injuries/deaths from other COVID-19 countermeasures.

The CICP does not maintain its aggregated data concerning alleged countermeasures, including vaccines, by specific manufacturer or trade name.

Alleged Countermeasure	Alleged Injury/ Death	Number of Claims
Failure to have infection control programs in place, the failure to have adequate infection control in place, the failure to properly train staff, the failure to provide sufficient staff, the failure to cohort infected and uninfected individuals, the failure to provide PPE to staff and residents, the failure to train on the proper use of PPE, the failure to have adequate procedures in place to deal with infection, the failure to adequately monitor residents for signs of infection, the failure to transfer residents to a higher level of care when needed, the failure to adequately treat residents with COVID, the failure to provide appropriate distancing among residents, the failure to properly report the number of COVID-19 cases and deaths to authorities, and others.
